Experience

Product designer of educational products in “SberEducation”

Jul 2022 – Present

- **Designed and shipped end-to-end experiences** for B2B and B2C EdTech products, from early concepts and user flows to implementation and iteration
- **Designed AI-powered experiences** for teachers and students, including AI assistants and learning workflows
- **Owned key product scenarios** across onboarding, profiles, homepage, learning, and goal-setting, using user feedback and product data to improve the experience
- **Advanced and maintained the design system** through reusable components and patterns, improving consistency across product teams and reducing rework
- **Strengthened design team alignment** by organizing design team meetings, syncs, and cross-team reviews, improving visibility and speed of decision-making
- **Mentored junior designers** and supported their onboarding and professional growth; also created an internal mentorship program connecting 40+ mentors across 12 disciplines

UX/UI designer in game dev company “22byte”

Sept 2021 – Jul 2022

- **Designed user-centric interfaces** for mobile applications and games, creating visually engaging UIs, logos, banners, and mockups tailored to diverse user segments and monetization goals
- **Optimized design workflows** by introducing templates, reusable ui components, and standardized design rules — increasing team output

About

Product designer with 5+ years of experience, 4 of them inside a large-scale EdTech company. I care most about the parts of the job that are easy to skip: understanding why a flow is confusing before redesigning it, keeping a design system honest as a product grows, and giving junior designers real feedback instead of just approvals. Outside of work I dance, sing, and travel — habits that keep me curious and change how I look at a problem.

Skills

- End-to-end product design: from ideation and concept development to high-fidelity prototypes
- Competitive analysis and product discovery: market and user research, idea generation, concept validation
- User interface design: web, mobile, and game products, applying strong visual design principles and creating consistent flows and styles
- User experience design: user research, interviews, surveys, hypothesis testing, and usability studies
- Prototyping: interactive prototypes in Figma, responsive layouts, and usability testing with stakeholders
- Design methodologies: Design Thinking, JTBD, CJM, USM, and persona development
- Product analytics: tracking and analyzing product metrics with tools like SimilarWeb and Yandex Metrics
- Design systems: building scalable UI kits, reusable components, and style guides
- Collaboration: cross-functional teamwork with PMs, developers, analysts, QA testers, UX writers, and researchers

from 20 to 58 projects per week and reducing delivery timelines by ~35%

- Applied knowledge of coding fundamentals and Unity game development to align UI/UX with gameplay mechanics, improving player experience and retention

Freelance

Apr 2020 – Current

- **Delivered end-to-end UX/UI design** for websites, branding, and digital products across EdTech, medical field, travel, and agriculture
- **Lifted conversion rates** by up to 30% through UX audits, redesigns, and optimized flows
- **Developed interactive prototypes** for an agritech startup to validate product hypotheses prior to development, reducing risk and saving resources
- Design critiques & feedback loops as well as cross-functional design leadership

Education

Aug 2019 Moscow Pedagogical State University, "Fundamental physics in English"

2020 The course in the format of the internship "UX/UI design" – Uprock school; Google UX/UI certificate course – Google Career Certificates
